### Call for Special Sessions

The 2016 International Symposium on Intelligent Signal Processing and Communication Systems (ISPACS 2016) will be held during 24-27 October 2016 at Phuket Graceland Resort & Spa, Patong, Phuket, Thailand. The symposium presents every possibility on new technologies based on signal processing and communications. ISPACS 2016 (IEEE Conference Record Number #37442) will include regular sessions and special sessions. The aim of the special sessions is to supplement regular programs by bringing together new or emerging topics of particular interests on ISPACS related domains including communication systems, multimedia and systems, signal processing, VLSI, and circuits and systems.

Prospective organizers of Special Sessions need to submit the following information:

- Title of the session,
- Short brief of the session, mentioning the novelty of the topic,
- Short biography of the organizers,
- List of at least five (5) prospective papers (including potential authors, contact information of the corresponding authors).

After the Special Session proposal has been approved, it is required that the authors submit the full paper manuscripts to the related Special Session track and the manuscripts should conform to the format and electronic submission guidelines of regular ISPACS papers. All submitted papers will be evaluated in the same way as regular papers in order to meet the ISPACS quality standard. If the number of accepted papers in the Special Session is less than FOUR (4), the session may be cancelled and the accepted papers will then be moved to regular sessions.

Proposals should be sent via e-mail (in either PDF or plain ASCII text format) to the Special Session Chair, Sinchai Kamolphiwong, E-mail: [sinchai.k@psu.ac.th](mailto:sinchai.k@psu.ac.th) by April 30, 2016.
